Pharmacists, a leader in live continuing education for pharmacists, invites you to a unique day of educational programs for pharmacists. Admission is FREE of charge and includes timely topics presented by nationally known SPEAKERS, good FOOD and networking opportunities. All programs are accredited by PharmCon, a nationally recognized ACPE provider of continuing pharmacy education. Get up to 7 Contact Hours of live credit. Statements of Credit will be issued on site!

Getting to the Heart of the Matter: Metabolic Syndrome
Presented by Geneva Clark Briggs, PharmD, BCPS, Clinical Associate, MedOutcomes, Inc.
(1.5 Contact hours) ACPE # 798-000-05-061-L01
What is metabolic syndrome and why should pharmacists care?
This session will address identification of patients who may have the syndrome and how to avoid long-term consequences of the syndrome.
Program Objectives Include:
1. Describe the primary pharmacological and non-pharmacological treatments for metabolic syndrome and its component diseases.
2. Describe the pharmacist’s role in screening and monitoring patients with metabolic syndrome.

Women’s Health Issues: Boning Up on Osteoporosis
Presented by Wendy Rosenthal, PharmD, President, MedOutcomes, Inc.
(1.5 Contact hours) ACPE # 798-000-05-062-L01
Today the average 65-year-old woman is active and dynamic! Yet, less than 1/3 of cases of osteoporosis have been diagnosed. Pharmacists’ interaction with this patient population is critical to help identify those at greatest risk for developing the condition and then achieving treatment goals. This program provides information on osteoporosis, its diagnosis and management.
Program Objectives Include:
1. Describe therapies for the prevention of osteoporosis.
2. Explain the mechanism of action and role in therapy of the drugs approved for osteoporosis.

Achieving Aggressive Lipid Goals with Dual Inhibition
Presented by Geneva Clark Briggs, PharmD, BCPS, Clinical Associate, MedOutcomes, Inc.
(1.5 Contact hours) ACPE # 798-000-05-063-L01
Given updated guidelines suggesting very low LDL goals for the highest risk patients, come learn the advantages of getting patients to target goals with combination therapy.
Program Objectives Include:
1. Explain the rationale for combination therapy in lipid management.
2. State the value of a co-administration approach in achieving NCEP goals.

A Common Question for Pharmacists: “What Can I Do for My Headaches?”
Presented by Curt Schreiber, MD, Medical Director, Headache Care Center
(1.5 Contact hours) ACPE # 798-999-05-006-L01
This program will provide an overview of the most commonly experienced headache types: migraine, tension, “sinus,” and cluster headache. It will then focus on treatment options for the most common disabling type of headache—migraine.
Program Objectives Include:
1. Know when a patient is failing with nonprescription therapy, and should be referred to their healthcare provider.
2. Understand the strategies for optimizing treatment outcomes from medications used to treat migraine attacks.

Pharmacokinetic and Pharmacodynamic Considerations in the Elderly
Presented by Mark A. Stratton, PharmD, CGP, Professor and Herbert & Dorothy Langsam Endowed Chair in Geriatric Pharmacy, University of Oklahoma College of Pharmacy
(1.0 Contact hours) ACPE # 798-000-05-060-L01
This program is designed to increase awareness of the pharmacist’s role in managing drug therapy related problems in the elderly population.
Program Objectives Include:
1. Describe the demographic implications of the baby-boomer and elderly population in health care.
2. Describe the pharmacokinetic and pharmacokinetic changes that occur in the elderly.
3. Understand the impact of these changes when reviewing an elderly person’s drug regimen.
4. List medications that are deemed inappropriate in the elderly.

Pharmacokinetic and Pharmacodynamic Considerations in the Elderly
Presented by Mark A. Stratton, PharmD, CGP, Professor and Herbert & Dorothy Langsam Endowed Chair in Geriatric Pharmacy, University of Oklahoma College of Pharmacy
(1.0 Contact hours) ACPE # 798-000-05-060-L01
This program is designed to increase awareness of the pharmacist’s role in managing drug therapy related problems in the elderly population.
